Art Unit: 3724

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 2, 7 and 8, drawn to tapered tearbar of circular cross section, classified in class 225, subclass 96.
  - II. Claims 3 and 5, drawn to roughened surface, classified in class 225, subclass 106.
  - III. Claim 6, drawn to internal shaft, classified in class 225, subclass 4.
  - IV. Claims 9-21, drawn to a method and apparatus using a strip of media, classified in class 83, subclass 27.

Claims 1 and 4 have none of the features of the subcombinations, and will be examined with any of the elected groups. If any of claims 1 and 4 is ultimately determined to be allowable, rejoinder of the claims dependent therefrom will be considered.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of groups I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the tapered tearbar of circular cross section of group I could be used without the roughened surface of group II, and conversely, the roughened surface of group II could be

Art Unit: 3724

employed without the tapered tearbar of a circular cross section of group I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. ~~A telephone call was made to on to request an oral election to the above restriction requirement, but did not result in an election being made.~~

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar Flores-Sánchez whose telephone number is (703)308-0167. The examiner can normally be reached on Monday through Thursday from 8:30 am to 4:00 pm.
